## SS 500M Ceiling Mounted Air Cleaner

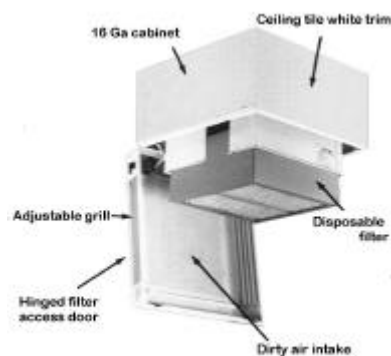

Office Work Environments

### Space Saver Air Cleaner:

The SS 500M is designed for control of dusts, mold spores, cigarette smoke, pollens and other indoor air contaminants in the office environment. The SRS 500 fits into a 2' x 4' ceiling grid with 11 inches of space above ceiling tiles required for normal installation. Trim accents are included for 2' x 4' ceiling grids where the tile would be manually cut in half using the units trim pieces to support one side of the tile. Unit profile is 3 inches below ceiling and is ideal for offices with eight to nine foot ceilings. Filter access is thru the swing down door for easy changing of filters

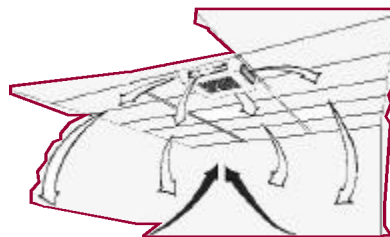

### How the SS 500 Works:

The blower draws the contaminated air from the room through a set of highly efficient micro-glass filters that separate the sub-micron particles from the air stream. The cleaned air is then discharged back into the room through four discharge grills directing the cleaned air away from the intake grill. The discharged air flow is across the ceiling and does not blow directly on office personnel. No duct work is required and there is no loss of either heat or air conditioning. Optional charcoal filters are available for those areas that demand the ultimate in clean air. This unit is available with Electrostatic filters as an alternative to disposable filters.

### SPECIFICATIONS

SIZE .....	23"W 23"L 15"H
WEIGHT .....	67 POUNDS
INPUT POWER .....	115 VOLT, 1 PH
POWER CONSUMPTION.....	230 WATTS
AIR FLOW.....	500CFM
MOTOR .....	1/15 HP,DD
CABINET.....	16 GA STEEL
COLOR.....	EGG SHELL
SPEED CONTROL.....	VARIABLE
FILTER.....	95% STD.,
PRE-FILTER.....	FOAM/CHARCOAL
BLOWER.....	PROPELLER
OPTIONS.....	HEPA FILTER CHARCOAL CELL
